
Photo Report City of Compton 1/13-14/2011 and 5/10-11/2011

A) Residential Curbside Diversion Program

Photo 1: Staff observed an 85 percent set out rate for residential recycling carts.

1

Photo 2: The City's franchise hauler collects and processes the residential recyclables consistently. The unloaded materials at the materials recovery facility (MRF) had minimal contamination.

2

B) Commercial Diversion Program

Photo 1: A commercial recycling bin with minimal contamination. Most bins observed had minimal contamination.

1

Photo 2: Staff observed several loads of recyclables from commercial businesses with minimal contamination. Staff estimates that the loads were 90+ percent clean recyclables.

2

C) Industrial Diversion Program

Photos 1-2: Below are pictures of a typical load from the Industrial Diversion Program. These loads were predominantly full of clean cardboard.

1

2

D) Multifamily Program

Photo 1-2: Staff observed several trash loads from the multifamily sector that contained some recyclables. Staff observation of several loads from other cities within the region, indicates that the City's multifamily trash loads are consistent with the region. In order to increase diversion from this sector, the franchise hauler has hired a bilingual Recycling Coordinator to provide outreach and education.
